

Six white horses

Let the waters run through me
Take a rest I can breathe
I adore you since I saw you
In the darkness just like me
in every thing I ever had
that make me smile and make me glad
in every way it's all right now
beside ourselves beside the sea
six white horses carry we

Let me tell you how I feel
Can't believe this is real
Put your head upon my shoulder
like we are seventeen
every choir in every tongue
will sing the love songs ever sung
every babe that never cried
will sing forever in the light
Six white horses taking flight

If I can't hold my head up with you
Some one might say
I am a loser
I use to – have faith
Hope was my friend
